Role/Style/Tone

Goal

Context

Instructions

# Resident < -- > Faculty

- While at the clinic, your attending needs to leave early because of a sick child. He tells you to “finish up” and he will check your work tomorrow. This is against the rules as you are a PGY1 and you need to be directly supervised and you are pretty sure it is also medicare fraud since the attending will not be seeing the patients.

# How about a patient encounter?

- Play your role
- Play your patient
- Be realistic
- Be creative
- Push AI

During the interaction, seek to discover themes rather than specifics. Ask AI to summarize.

# Scenarios

- Women should be nurses. Being a Doctor is a man's job.
- If you cannot speak the language, you have no business working here.
- Just because you went to school for so long doesn't mean you know everything!
