

Feature Live: Distribute Checklists to Any Resident or Fellow on a Rotation

New Innovations has expanded its Checklists offering for graduate medical education (GME). It is now even easier to collect data from any resident or fellow on a rotation schedule. Whether they are currently affiliated with your institution, visiting or otherwise, we've streamlined the process for distributing Checklists to these learners with all the data centralization and tracking to which you've already been accustomed.

Key Enhancement Highlights

- Enables distribution of checklists to ANY resident/fellow assigned on a rotation
 - Use the newly labeled Rotation tab to:
 - Distribute manually to all programs (not just "rotator" programs)
 - Distribute manually to selected residents by person, rotation, start date and end date
 - Distribute automatically to ANY resident/fellow when they are added to personnel or before they start their rotation
- Relabels existing in-rotator type of checklist, enhancing manual and automatic distribution
- Centralizes data gathering and tracking

Thank you for using New Innovations!
